Resume

- I am a Computer Science student at the University of Iași, passionate about technology and eager to grow professionally. I've worked on several personal and academic projects.
- Open to any technical role, with a strong focus on cybersecurity. I thrive in collaborative teams and actively seek opportunities to step out of my comfort zone.

Education

"Alexandru Ioan Cuza" University of Iași, Faculty of Computer Science Oct 2024 – Present

- Bachelor of Science in Computer Science
- Currently in 2nd year

National College "Emil Racoviță" Iași

Sep 2020 – Jul 2024

- Baccalaureate Exam: Grade 10 in Computer Science and Mathematics

Experience

Projects (available on GitHub)

- **Chess**: a multiplayer chess app in **Java**. Implemented an algorithmic opponent powered by a Minimax search tree with alpha-beta pruning, and real-time cloud synchronization via Firebase REST API for online matches. [Link](#)
- **Secured Vault**: using **Python**, **AES encryption**, secure user management, and **2FA** using QR Codes. The app allows users to register, log in, and manage encrypted files in personalized vaults. It features password strength validation, dynamic UI elements. [Link](#)
- **Grid Admin**: a multithreaded Client-Server LAN tool in C using GTK+. Designed a custom **TCP** protocol secured with **AES-256** (OpenSSL) for **SSH remote execution** and **SQLite** persistence, while leveraging **UDP** broadcasts for **Wake-on-LAN** and raw sockets for network discovery. [Link](#)
- **Nassi-Shneiderman diagram generator**: a C++ academic project that generates **Nassi-Shneiderman** diagrams based on pseudocode. The app includes multiple files, direct edit, even ads, zoom in/out. [Link](#)
- Created versions of Snake and Pong game, applying **OOP concepts** and using **Python**. Snake Pong
- **Website**: a website about "A healthy lifestyle", using **HTML**, **CSS**. [Link](#)

Events

- Attended "FII Practic" 2024, the "Journey into **Artificial Intelligence**" section, where I've learned and implemented different ML algorithms such as ID3, kNN, Bayes Naive and Optimal, Logistic Regression, Neuronal Networks.
- Attended the 2025 'Fii Practic' **Hackathon** as part of a 5-member team, where I utilized Node.js, Prisma, Tailwind CSS, and other technologies.

Certificates

- "Cisco Networking Basics", where I have gained foundational knowledge of networking, covering network devices, media, protocols, data flow observation, and practical device configuration. [View Certificate](#)
- "Google Cybersecurity Professional Certificate V2", where I've covered topics such as network security, cryptography basics, threat analysis, ethical hacking fundamentals, SQL and Python. [View Certificate](#)
- "Google IT Automation with Python", where I've covered topics such as Python, Cloud Services, GitHub, Bash, Version Control, CI/CD and Containerization, . [View Certificate](#)
- "Google Data Analytics Professional Certificate", where I've learned about spreadsheets, SQL, Tableau and R. [View Certificate](#)
- "Oracle Cloud Infrastructure 2025 Certified Foundations Associate", where I have gained foundational knowledge of core OCI services, security model, governance, and cost management. [View Certificate](#)

Skills

Programming Languages

- Intermediate: C/C++, Python
- Basic: HTML/CSS, SQL, Shell Script (Bash), Assembly

Networking & Cybersecurity

- Computer Networks, TCP/IP Protocols, Network Security, Ethical Hacking Fundamentals

Tools & Platforms

- Linux Environments, Git/Version Control, Cloud Services (OCI), CI/CD, Data Analytics

Core Concepts

- Object-Oriented Programming (OOP), Data Structures, Operating Systems, Computer Architecture, Formal Languages and Compiler Design

Languages

- **English** (C1 level), **Romanian** (Native)
